

Facilitating Smart Cities evolution in India

SATRC Web-Dialogue 30 October 2024

Shri Abdul Kayum, Advisor TRAI

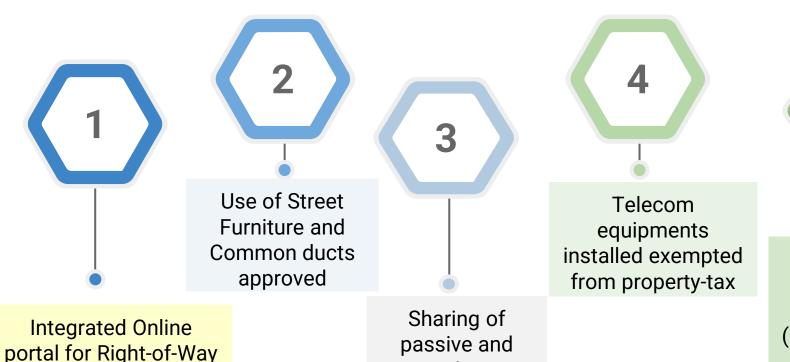

Focal areas

Spaces for Infrastructure augmentation

active elements

(RoW) permissions

Common
Telecom
Infrastructure
(CTI) included in
the National

Building Code.

Liberalised Resource Management Regulatory Sandbox 100 Dedicated spectrum labs for 5G use-cases resources for on-the- move communications e.g. metro / tube trains

Fastest 5G deployment by ensuring enough spectrum availability. Efficiency gain through harmonization and re-farming IoT/M2M Authorisation Rules: e-SIM interoperability, spectrum availability (un-licensed & un-licensed bands)

Digital Connectivity
Infrastructure Provider
(DCIP) Authorization for
fast -expansion of
underlying infrastructure

Promoting Inclusivity and Equitable Access +Sustainability

GISmapping

Continuous GIS mapping of telecom assets and other public assets

Smartpoles

Multi-functional Smart poles (public wi-fi, IPcamera, light post, charging point) at dense public places

Indigenous Manufacturing

Including multi-band Antennae, Small Cells, Base Stations etc. on the rise

Circular Economy

Open Access to Green Power, Right to Repair & Waste mgmt. for Circular economy

Thank you
